## **Secure Health and AllHealth CHOICE announce Partnership**

Secure Health is pleased to announce they have chosen AllHealth CHOICE (AHC) to be its virtual care management vendor to support their chronically ill populations' complex healthcare needs. Leveraging CHARLIE, AllHealth's CHOICE platform, allows for the integration of the latest technology in remote monitoring of daily living activities, telehealth, socialization, patient engagement and care coordination combined with experienced nurse case managers, into one comprehensive service.

"We are delighted to partner with AllHealth CHOICE and are especially pleased that CHARLIE has already delivered immediate results for our covered members. Utilizing integrated professional and compassionate care management with innovative technology produces bottom line results for both patient and payor" said Secure Health's CEO, Al Ertel.

This innovative platform proactively reduces critical events, hospital admissions and re-admissions by transmitting red flag information to medical providers, the care managers and family caregivers. The program's success has quickly demonstrated a 51% reduction in hospital re-admissions as well as a 75% reduction in ED visits, improved medication adherence with in-house pharmacists for 100% medication reconciliation within 24 hours. Early intervention is necessary in order to ensure appropriate support for those Secure Health members who demonstrate this need. Carol Jeter, Secure Health's Director of Care Management stated "Keeping our case managers closely connected and readily available makes a difference when it matters most."

AllHealth CHOICE co-founder and Chief Strategy Office, Juliette Simpson, said "At the heart of the healthcare industry are people, people delivering medical care, and people who need medical care. We are excited to work with Secure Health in reducing their clients overall healthcare costs, yet improving the health status and outcomes of their members living with chronic and complex health issues.

###

### About Secure Health -

Secure Health, located in Macon, Ga. Is a total benefits solution for its customers by providing Administrative Services, Care Management and health lifestyle programs to employers who have chosen to self-fund their employee health benefit plans.
